MACOMB COMMUNITY COLLEGE

The idea was
ahead of its time...
Higher Education Partnerships

The Macomb University Center (UC) is the first of its kind—anywhere. The concept: in partnership with 9 four-year institutions, you can complete a bachelor's, master's or doctoral degree in over 50 different fields—right on Macomb College's Center Campus.

The Macomb University Center was

opened in 1991 to meet the needs of people like you: ambitious, focused on your career, ready to add to your credentials, and eager to move ahead professionally.

Most of all, the UC responds to reality: you're busy, and a degree program that fits your schedule and is conveniently located is a real benefit. On average, UC students work 38 hours per week. They include men and women in the process of a career change, professionals who have reached a career plateau, and individuals who want to move up the career ladder.

Every degree program offered is designed to provide the fundamentals needed for success. The partnership brings together Macomb College and the prestige of Michigan's leading colleges and universities including:

- Central Michigan University
- Ferris State University
- Madonna University
- Michigan State University
- Oakland University
- Rochester College
- University of Detroit Mercy
- Walsh College
- Wayne State University

Macomb provides the technologically-rich facilities and the resources you need to succeed, and our partner institutions provide the faculty and the curriculum. When you enroll, your financial obligation will be to that institution and your degree will be awarded from that institution as well.

In 2009, the Macomb University Center became home to an expansion site of the Michigan State University College of Osteopathic Medicine (MSUCOM). The MSUCOM at the UC provides the first two years of an osteopathic physician's education.

Your best source of information for transferring to a Macomb University Center partner is to contact the institution you wish to attend. Each partner has an office located in the Macomb University Center; or, if you are a Macomb student, our counselors and advisors can assist you.

Following in this catalog is information about each partner and their programs and courses offered at the UC. Still have questions? Feel free to contact us at 866.Macomb1 or visit www.macomb.edu.

Central Michigan University, Michigan's fourth largest state university founded in 1892, offers several undergraduate and graduate programs at the Macomb University Center.

Programs Offered

Bachelor's Degrees

- Bachelor of Applied Arts in Administration
- Bachelor of Science in Administration
- Bachelor of Science in Community Development

Graduate Certificates

- Acquisitions Administration
- General Administration
- Health Services Administration
- Human Resources Administration
- Information Resource Management
- International Administration
- Leadership
- Public Administration

Master's Degrees

- Master of Science in Administration

Admission

There are three convenient ways to apply for admission.

1. Apply online (pay by credit card or electronic check draft)
2. Download and print an application (pay by mail)
3. Request information and application to be mailed
 - Information Packet Request
 - Call 877.268.4636

You must be admitted to the university before you can begin taking classes. A \$50 nonrefundable application fee is required in order to complete the application process. The application fee can either be paid online with a credit card or electronic draft, or by mailing a check or money order to the center to which you are applying.

CMU must have one official transcript from each of the institutions you've attended.

Registration

Complete priority registration information is available at www.cel.cmich.edu/regnews.

Tuition & Payment Information

Visit www.cel.cmich.edu/finances for current tuition rates and fees.

Refund Policy

For students to receive a 100% refund they MUST drop the course prior to the start date. A \$50 fee will be assessed and refunds will be prorated after the second class meeting. For more information, visit www.cel.cmich.edu/courses/drop-withdraw.aspx.

Textbooks

Textbooks are ordered directly from MBS and mailed to students.

MSU is dedicated to addressing the ever-growing public demand for physicians who can provide comprehensive and continuing health care to all members of the family.

Doctor of Osteopathic Medicine–MSU

The college is dedicated to addressing the ever-growing public demand for physicians who can provide comprehensive and continuing health care to all members of the family. While the educational program of the MSU College of Osteopathic Medicine is geared primarily to the training of primary medicine physicians, the curriculum and educational programs are designed also to meet the continuing need for medical specialists and teacher-investigators. Traditionally, osteopathic education seeks to prepare physicians who are especially concerned with maintaining continuing personal relationships with patients, their families, and their optimum interaction with the community environmental patterns. This emphasis is reflected in the nature of the curriculum and particularly reinforced during clinical clerkship rotations through a variety of clinical disciplines in both hospital and non-hospital settings. For more information see <http://www.com.msu.edu/program>.

Michigan State University College of Osteopathic Medicine–MSUCOM

As of July 2009, the Michigan State University College of Osteopathic Medicine is conducting courses at three sites: in East Lansing on the MSU campus, at the Detroit Medical Center downtown, and at the Macomb University Center. Associate Dean Kari Hortos, D.O., leads this site. MSUCOM has consistently ranked in the top 10% of all medical schools in the nation for its primary care education.

Programs Offered

- Doctor of Osteopathic Medicine (D.O.)

As of May 2011, MSU is offering Physiology 310 and Anatomy 350 at the Macomb University Center. Both of these courses can help to fulfill prerequisite course requirements for admission to MSUCOM. Please contact the MSUCOM admissions counselor for details.

Admission

Admission to MSUCOM requires competitive undergraduate grade point averages, MCAT scores, application to AACOMAS, transcripts, evidence of significant volunteerism, and other requirements. Virtually all applicants hold at least a bachelor's degree. Pre-admissions counseling is highly recommended, as is planning for medical school as early as possible. For full up-to-date information, see <http://www.com.msu.edu/admissions> or call 517.353.7740 to schedule an advising appointment at Macomb, Detroit, or East Lansing.

Registration

Information on registration is provided directly to students who are offered admission. College of Osteopathic Medicine courses are not available to students who are not enrolled at MSUCOM.

Tuition and Payment Information

Information on tuition and other costs is available at <http://www.com.msu.edu/budget>. For general MSU medical student financial aid, see <http://www.finaid.msu.edu/med>. Students should anticipate the possibility of moving to another Michigan community after the second year in order to complete the two years of required clinical education at one of MSUCOM's Statewide Campus System hospitals.

Refund Policy

MSU's operational policies, including the refund policy, may be found at <http://ctrl.msu.edu/costudentaccounts/operationpolicies.aspx>. Basically, 100% of the semester course fees and tuition for net credits dropped will be refunded if changes are made through the first quarter of the term of the class. After the first quarter of the term, no refund will be made for any credits dropped.

Academic Calendar

Schedules in the College of Osteopathic Medicine may vary by year enrolled. Key dates below are for the Class of 2015 (entering 2011):

Summer

Classes begin June 27, 2011

Last day of classes. Aug. 22, 2011

Fall

Classes begin Aug. 29, 2011

Classes end Dec. 16, 2011

Spring

Classes begin. Jan. 9, 2012

Classes end May 3, 2012

OAKLAND UNIVERSITY—OU

With a continued commitment to expanding access to higher education in Macomb County, students can earn an Oakland University degree where they live or work.

Oakland University is a growing, nationally recognized academic institution offering students unique and distinctive academic experiences that prepare them to make meaningful and substantial contributions to the community and the workplace. OU offers a wide variety of bachelor's, master's, Ph.D., and certificate programs through the College of Arts and Sciences, and the Schools of Business Administration, Education and Human Services, Engineering and Computer Science, Health Sciences, Nursing and the Honors College.

With three convenient Macomb County locations—the Macomb Intermediate School District, the Anton/Frankel Center in Mt. Clemens and the Macomb University Center—Oakland University offers several bachelor's and master's degrees right in the county where you live or work. Visit oakland.edu/gomacomb.

M2O Partnership

In 2006, Oakland University and Macomb Community College expanded their partnership to create a unique joint admission program which allows students to be admitted to both institutions from day one. This award-winning program is the first of its kind in the state of Michigan, and offers students greater affordability, maximum flexibility, and many more choices on the path to an OU bachelor's degree. Visit oakland.edu/M2O.

Programs Offered

Bachelor's Degrees

- Bachelor of Arts in Communication
- Bachelor of Arts in Journalism
- Bachelor of Integrative Studies
- Bachelor of Science in Computer Science
- Bachelor of Science in Computer Engineering
- Bachelor of Science in Electrical Engineering
- Bachelor of Science in Elementary Education (majors available in Integrated Science, Language Arts, Mathematics, Modern Languages, and Social Studies)
- Bachelor of Science in General Management
- Bachelor of Science in Human Resource Development
- Bachelor of Science in Mechanical Engineering

Master's Degrees

- Master of Arts in Counseling (two-track option: school or community/agency)
- Master of Arts Teaching, Reading & Language Arts

Admission

Please complete a free application online at oakland.edu/apply.

For detailed information and deadlines, please visit oakland.edu/go or oakland.edu/grad for graduate admissions information.

Registration

To be eligible to register for courses at the Macomb University Center, you must be admitted to OU and have no academic or financial holds on record. Please refer to your SAIL account to determine if you have any holds. For more information and to view a schedule of classes, visit oakland.edu/registrar.

Tuition Information

OU tuition is assessed based on the student's status as an Undergraduate-Lower Division, Undergraduate-Upper Division, or Graduate Student. For the most current information visit oakland.edu/tuition.

Refund Policy

Visit oakland.edu/registrar for a complete refund schedule.

Textbooks

Textbooks can be ordered online using the Barnes & Noble Bookstore at Oakland University. Visit <http://oakland.bncollege.com>.

ROCHESTER COLLEGE—RC

Rochester College is an accredited, private, coeducational, liberal arts college that provides academic excellence in a Christian setting.

(Rochester College's main campus is located in Rochester Hills—approx. 20-minute drive from the University Center.)

The college grants bachelor's and associate degrees in a diverse array of academic areas and attracts students who seek to develop themselves as scholars and leaders. Rochester College is committed to a personalized learning experience, where instructors know you by name and take personal interest in your success. Rochester College offers degree programs delivered in convenient evening and weekend accelerated programs. Classes meet once a week for eight weeks, allowing students who have finished their foundation credits to complete their degree in just twelve months.

Programs Offered

Bachelor's Degrees

- Bachelor of Business Administration in Management
- Bachelor of Science in Counseling Psychology
- Bachelor of Science in Early Childhood Studies
- Bachelor of Science in Organizational Leadership and Communication
- Bachelor of Science in Mass Communication/MACA

Admission

Admission applications are available on the college website, rc.edu/cel or from the Rochester College office in the University Center, Room 202. Students must have transcripts from all institutions attended sent to Rochester College.

Registration

UNIVERSITY OF DETROIT MERCY—UDM

As Michigan’s largest independent university, University of Detroit Mercy has an outstanding tradition of academic excellence, firmly rooted in a strong liberal arts curriculum.

This tradition dates back to the formation of the two Detroit institutions: the University of Detroit founded in 1877 by the Society of Jesus (Jesuits) and Mercy College of Detroit, founded in 1941 by the Religious Sisters of Mercy. In 1990, these schools consolidated to become University of Detroit Mercy—a university dedicated to providing affordable, accessible, quality education, while meeting the career preparation needs of a diverse student population.

Programs Offered

Bachelor’s Degrees

- Bachelor of Arts in Financial Economics
- Bachelor of Science in Addiction Studies
- Bachelor of Science in Health Services Administration
- Bachelor of Science in Nursing (Degree Completion)

Master’s Degrees

- Master of Arts in Economics
- Master of Arts in Financial Economics
- Master of Health Services Administration
- Master of Science in Nursing in Health Systems Management (MSN)

Admission

Please complete a free application online at www.udmercy.edu/apply. The application fee is waived.

Registration

Complete information on class schedules, payment methods and registration procedures is available at www.udmercy.edu/weblink. New students must see their academic advisor prior to registration.

Tuition & Payment Information

Information regarding UDM’s tuition and fees may be found at http://www.udmercy.edu/apply/financial_aid. For the discounted cost of University Center programs, please call 586.263.6232.

Live. Breathe. Business. Walsh College is the area's only all-business college, offering business and IT degrees to upper-division undergraduate and graduate students through the University Center at Macomb, as well as throughout metro Detroit and online.

Founded in 1922, Walsh College delivers a business education that integrates application and theory to prepare graduates for successful careers. Hundreds of students who complete their bachelor's degree at Walsh return for a Walsh master's degree. Through the Walsh Honor's Fast Track program, students can earn three degrees (associate, bachelor's, and master's degrees) in as little as five years. Classes are offered year-round in 11-week semesters and are designed for working adults.

Programs Offered

Bachelor's Degrees

- Bachelor of Accountancy
- Bachelor of Business Administration with majors in Accounting Processes, Finance, General Business, Management or Marketing
- Honors Fast Track Program (joint honors program with Macomb Community College)

Master's Degrees

- Master of Business Administration with specializations in various areas

Admission

Please refer to the Walsh College website at <http://www.walshcollege.edu/admissions>. Individuals seeking admission to any Walsh program may obtain an application from any Walsh College campus location, or apply online at www.walshcollege.edu/admissions.

- Master of Arts in Employment and Labor Relations
- Master of Social Work

* Classes are held at Macomb Community College South Campus in Warren.

Admission

Applications for admission to WSU are available online at www.wayne.edu.

WayneDirect at Macomb

When you're admitted to WayneDirect, you have the upper hand. You'll know your way around campus and who are the right people to talk with about your academic goals—even before you fully enroll in courses at Wayne State. This program is for Macomb Community College students who want to get a head start on earning their bachelor's degree from Wayne State. We even give you the opportunity to concurrently enroll in classes at Wayne State while you continue working toward an associate degree at Macomb. You have the advantage of working with faculty and staff from both institutions to make a smooth transition to Wayne State.

Benefits

- Reduce your overall tuition cost
- Start now with early admission to Wayne State
- No application fee
- Complete your bachelor's degree faster with concurrent enrollment
- Maximize your financial aid award
- Coordinated advising and program planning
- Use Wayne State libraries
- Live on campus at Wayne State
- Obtain a Wayne State student ID card
- Access more academic resources
- Work out at WSU's recreation and fitness facilities
- Attend Wayne State events

Registration

Prepare to register at classschedule.wayne.edu

Register on the web at pipeline.wayne.edu

Phone registration available at 313.577.3279.

Tuition & Payment Information

Please visit reg.wayne.edu/students/tuition/php for tuition and fee information.

Textbooks

Please visit the Wayne State Bookstore online at wayne.bncollege.com.

Academic Calendar

Fall

Priority Registration	March 28–Aug. 20, 2011
Open Registration	Aug. 22–30, 2011
Late Registration	Aug. 31–Sept. 7, 2011
Classes Begin.	Aug. 31, 2011
Classes End	Dec. 12, 2011

WINTER

Priority Registration	Nov. 7, 2011–Dec. 31, 2011
Open Registration	Jan. 2–7, 2012
Late Registration	Jan. 9–14, 2012
Classes Begin.	Jan. 9, 2012
Classes End	April 23, 2012

ARTS & SCIENCES

Bachelor's Degrees

Bachelor of Arts in Communication—OU

Communication is a liberal arts major designed to engage students in creating a voice for influencing our social world. The communication program is student-centered with small class sizes and active interaction between students and professors. The job possibilities are extensive for communication graduates. Our students find employment in a wide variety of areas such as public relations, advertising, sales, event planning, speech writing, training, management, politics, government relations, and employment services. The program emphasizes combining theory and practice, so that students gain knowledge and hands-on experience that will assist them in a range of professional endeavors.

Bachelor of Arts in Integrative Studies—OU

This program is perfect for career-changers and those adult learners interested in turning accumulated college credit into a bachelor's degree. The program offers students the opportunity to make decisions about their course of study by working with counselors and faculty mentors to design an individualized plan of study which may include one or more minors from a variety of academic departments.

Bachelor of Arts with a major in History—WSU

History is central to our understanding of the human experience. The study of our past allows us to place our world in context, whether we want to understand international crises, the significance of a national election, or social relations within our own community. The skills of the historian—the ability to do extensive research in original sources, to think critically, and to write clearly and persuasively—are highly valued in our changing world and serve as an excellent preparation for a variety of careers.

Bachelor of Arts in Journalism—OU

Journalism is a liberal arts major designed to prepare students for careers in all aspects of journalism, from news to public relations and advertising, and across all platforms of mass media, including print, broadcast and online. It is a student-centered, writing-intensive program with small class sizes. All classes involve active student participation. Students may concentrate on either print, broadcast or online journalism within the news track, or may choose to follow a course of study that focuses on public relations or advertising, or a combination of those areas of study. All journalism majors also study courses that apply across the profession, such as media ethics and law.

Bachelor of Science in Mass Communication/MACA—RC

The Bachelor of Science in Mass Communication degree completion program provides you with a unique educational opportunity through a partnership between Rochester College and Macomb Community College.

The program incorporates training in Macomb's AAS Media and Communication Arts Program with in-depth explorations of theory and scholarship in media at Rochester College.

The curriculum is designed to help you expand your understanding of communication and develop essential skills needed to succeed and advance within the media industry.

Students interested in Mass Communications with a track in Media and Communication Arts must have completed a minimum of 50 credit hours from the Media and Communication Arts (MACA). Visit www.macomb.edu for more information on the MACA program at Macomb Community College.

Bachelor of Science in Organizational Leadership and Communication—RC

This degree program is comprised of a versatile curriculum that builds upon previously completed course work in specialized or technical fields and specifically focuses on building the qualitative skills necessary for various leadership roles within small or large organizations. This program will help develop skills desired by employers through exploration of leadership, management, and communication theories while developing analytical thinking skills and writing proficiency.

Bachelor of Arts in Public Relations—WSU

Public relations is an exciting and challenging field which demands individuals with excellent communication skills and training. Most public relations classes are taught by faculty members who have professional experience in addition to their academic training. The practical applications of ethics are carefully considered. The program pays special attention to effective written and oral communication as well as developing a fundamental understanding of human communication and research methods. For complete course requirements please refer to the College of Fine and Performing Arts website at www.cfpc.wayne.edu.

BUSINESS

Bachelor's Degrees

Bachelor of Accountancy (BAcct) – Walsh

This degree is designed for students interested in entering the accounting profession and interested in attaining CPA licensure. For specific subject/credit hour requirements, view the Michigan State Board of Accounting website, (www.cis.state.mi.us/bcs/acct/).

Bachelor of Applied Arts in Administration – CMU

Like the BS degree, the BAA works well for students working in administrative careers in the public, non-profit and private sectors. The core courses provide a foundation in administrative competencies that are common to most supervisory positions, and the concentrations allow you to focus on an area of particular interest. The BAA allows you to take maximum advantage of licensure or other credentials you have already earned in your field. Appropriate course work and experience can be transferred into the program to meet requirements for one of several minors such as: Allied Health, Community Justice, Economics, Industrial Technology, Nursing and Psychology. Graduates of this program are prepared for mid-level administrative positions in industry, hospitality, health care and related fields.

Bachelor of Business Administration (BBA) – Walsh

This program familiarizes students with all aspects of business while they major in the area that most interests them. Curriculum may be viewed at www.walshcollege.edu/undergraduate. Choices include:

- Accounting Processes: Basic exposure to taxation and thorough exposure to financial statement preparation; designed for non-management accounting positions in corporate, small business, or non-public accounting for students who do not wish to pursue the professional accounting examinations.
- Finance: Accounting, business law, and taxation concepts; financial analysis, planning, and management. Preparation for the fields of credit analysis, commercial lending, brokerage and financial services, financial planning, financial analysis, and financial institution management, as well as industry and government careers.
- General Business: A basic business education designed to complement prior education and/or experience; offers flexible course selection and timely degree completion.
- Management: Develops an understanding of decision methodology, business resource management, organization structures, business strategy, and business policy. Emphasizes

management principles, decision-making and problem-solving skills; and interpersonal relationship techniques.

- Marketing: Covers product, pricing, place of distribution, and promotion; research and analysis; distribution management; public relations; and international marketing. Prepares to begin careers in sales, market research, promotion, retailing, distribution, advertising, public relations, direct marketing, telemarketing, or purchasing.

Bachelor of Arts in Business Administration with a major in Global Supply Chain Management – WSU

Every successful organization owes a portion of its success to effective supply chain management and logistics. These processes focus on the production and distribution of goods and services. The market in which organizations compete has become increasingly global as they work with nondomestic suppliers, outsource business functions, and market goods and services to consumers around the world. Business leaders realize that a sustainable approach to managing global supply chains plays a significant role in achieving success. They need well-qualified supply chain professionals to meet the challenges and recognize opportunities.

Bachelor of Science in Administration (BSA) – CMU

This degree program is primarily focused on the needs of students pursuing administrative careers in the private sector. The administrative core courses provide a foundation in managerial competencies that are common to most administrative positions, and the concentrations allow you to focus on an

area of particular interest. Graduates of this program are prepared for careers as production managers, human resources administrators, small business owners, and other mid-level managerial positions.

This program is an excellent choice for students with a specialized associate degree, such as business construction technology, legal assistance, and others. It is also great for students with an associate degree in business who would like to add technical or specialized training to their credentials.

Bachelor of Arts in Financial Economics—UDM

This program entails the academic study of finance with a strong foundation in the theory and application of economic principles. Within the context of a liberal arts education, the program provides a deeper knowledge of history, institutions and world economy, and prepares you to think critically about moral and ethical issues that occur in the realm of financial economics.

The program curriculum focuses on:

- the role of financial economics within financial institutions, industry and government
- international finance and how it relates to the U.S. economy
- basic economic models and theories
- application of basic moral and ethical principles in the analysis of economic systems and issues

Bachelor of Science in General Management—OU

The purpose of the general management major is to enable a student to choose a variety of management courses with the greatest flexibility (keeping in mind that core course requirements are the same for all majors). Substantial numbers of employers are looking for broadly educated students at the bachelor degree level, and many students are not ready to specialize early in their careers. General management majors still take courses in accounting, information systems, finance, organizational behavior, marketing, operations management and business policy. Students who intend to continue into a more specialized graduate school program may want to consider this option.

Bachelor of Science in Business Administration—Professional Track—FSU

This program will prepare you for the rapidly changing nature of the work environment in business, government and other nonprofit organizations and equip you with the skills you need for entry-level positions as well as advancement.

Building upon a core of business courses, the

program features a tight sequence of major courses; however, the program also provides the flexibility to specialize in an area of business administration for the student. Students with associate degrees in technical fields will find the program attractive for building a solid knowledge of business and management upon their technical expertise. The major is also valuable as preparation for law school, as well as for graduate studies in business.

Bachelor of Business Administration in Management—RC

This degree program – The Bachelor of Business Administration with a management major degree completion program – offers a broad-based and versatile education in business management. Courses focus on the most pressing issues facing business and industry today. Collaboration with the business community will assure that this degree program is both practical and valued by employers. This program will prepare students for graduate programs in business.

Bachelor of Science in Hospitality Management—MU

This program addresses the emerging importance of the hotel, restaurant, and tourism industries, by preparing students for management careers in the hospitality field. As part of Madonna's program, students complete an internship or cooperative education experience with a hospitality employer.

Course work relates to all the aspects of the industry: food service, lodging and resort operations, tourism, and conference and event planning.

Bachelor of Science in Paralegal Studies—MU

This degree completion program allows Associate of Applied Science Legal Assistant graduates to receive a Bachelor of Science degree in Paralegal Studies from Madonna University's American Bar Association approved program. The focus is on legal research and the technology utilized in a modern law practice setting. Students can major in Paralegal Studies for law school.

Master's Degrees

Master of Science in Administration (MSA)—CMU

This degree is a 36-semester-hour degree program that provides the knowledge and skills required for administrators and supervisors to function more effectively in a wide variety of administrative settings, plus the specialized processes and competencies needed for a particular professional field. GMAT or GRE entrance examinations are not required. If you are interested in upgrading your credentials, but not sure that you want to earn a complete master's degree, you can opt for a graduate certificate from CMU. Each of the MSA concentrations is available as a graduate certificate and include Acquisitions Administration, General Administration, Health Services Administration, Human Resources Administration, Information Resource Management, International Administration, Leadership, and Public Administration. You can apply credits earned in the certificate program to the MSA degree if the concentration is the same.

Master of Business Administration (MBA)—Walsh

This program prepares professionals for higher levels of responsibility within an organization. This distinctive program encompasses the study of accounting, finance, management, and related disciplines. All MBA courses emphasize decision-making and the development of systematic approaches to solving complex problems. The Walsh MBA includes the opportunity to specialize in the areas of accounting, business information technology, economics, finance, information assurance, human resource management, marketing, project management, strategic leadership, supply chain management, and taxation. Master of Business Administration curriculum may be viewed at www.walshcollege.edu/pages279.asp.

Master of Arts in Economics—UDM

This degree program offers you the ability to learn and apply economics and financial principles to the U.S. and international financial systems. Grounded in a liberal arts foundation, the degree program also provides you with a deeper knowledge of history, institutions and world economy. The degree program includes two tracks including the Theory Track, which is more academically oriented, and the Applied Track, which is more practically oriented. The Economics graduate program will prepare you for career advancement in the private sector (non-profit institutions, school systems, industry and financial institutions) as well as in various levels of government. The degree will also prepare

you for managerial advancement in the rapidly emerging international sector of the economy. Upon completion of the graduate degree in Economics, you will have:

- working knowledge of how economics is woven into the fabric of institutions, industry and government
- an understanding of international economics and how it relates to the U.S. economy
- a greater awareness of moral and ethical issues and principles as they relate to economic concepts and theories

Master of Arts in Financial Economics—UDM

This degree program focuses on the study of economics and financial principles related to U.S. and international financial systems. The program also provides a deep knowledge of history, institutions and world economy. As a liberal arts degree, the program also addresses moral and ethical issues related to the field of finance. Upon completion of the graduate degree, you will understand:

- how financial economics is integral to financial institutions, industry and government
- international finance and its relationship to the U.S. economy
- a variety of economic models as well as the moral and ethical implications of economic decisions and options
- the U.S. system of money, banking, and other business expertise
- investments and U.S. government policy and financial systems
- the relationship between the public and private sectors

EDUCATION

Bachelor's Degrees

Bachelor of Science in Elementary Education—OU

This degree program is designed to provide a strong general education background paired with an exemplary education major. It prepares students for a career in teaching and leads to teaching certification for selected majors including Integrated Science, Language Arts, Mathematics, Modern Languages, and Social Studies.

Elementary teacher certification gives the opportunity to teach all subjects in grades K through 5, all subjects in a K through 8 self-contained classrooms, and in endorsed subject areas for grades 6, 7, and 8.

The program is a field-based model in which issues and topics that make up the university curriculum are immediately put into practice in public school classrooms. Students will complete a minimum of two urban and two suburban placements.

Bachelor of Arts/Science in Education (Elementary Certificate—Science or Math Major)—WSU

The WSU Elementary Education Program at University Center offers a Bachelor of Science or Arts in Elementary Education. Students may choose to major in either Group Science or Mathematics. The Group Science major includes courses in astronomy, biology, chemistry, geology, and physics. Both majors also include additional methods courses offered by the College of Education. A minor in Science or Math is optional. The elementary certificate earned in this program qualifies the holder to teach all subjects in K–8 in a self-contained classroom, and K–5 in all subjects. Additionally, the major and minor subjects may be taught in the sixth through eighth grades. For complete course requirements please refer to the College of Education website at www.coe.wayne.edu.

Bachelor of Arts/Science in Elementary Education with a major in Special Education with a concentration in Cognitive Impairment—WSU

Teaching as a profession has never been more exciting. Increasingly, certified teachers in the area of Special Education are in high demand and are especially successful in obtaining employment. The WSU Elementary and Special Education Program at the University Center-Macomb leads to a Bachelor of Arts or Science in Elementary and Special Education with an endorsement in Cognitive Impairment. The program is designed for you to receive a Michigan Elementary Provisional Teaching Certificate for teaching all subjects in grades K-5, all subjects K-8 in a self-contained classroom, and for teaching students who have cognitive impairments in grades K-12. For complete course requirements please refer to the College of Education website at www.coe.wayne.edu.

Master's Degrees

Master of Education in Bilingual/Bicultural Education with a concentration in English as a Second Language—WSU

This program is appropriate for teachers with elementary or secondary certification with a teaching major in an approved content area. This program provides advanced training in English as a Second Language teaching methodology, linguistics and culture. In addition, students who specialize in this area are eligible to apply for the Michigan English as a Second Language endorsement.

Master of Education in Special Education and a concentration in Autism Spectrum Disorder—WSU

WSU develops professionals who are committed to helping others acquire the knowledge, skills and understanding necessary to participate in and contribute to a complex, changing society. This program is designed as an endorsement program to meet the Michigan Department of Education Special Education rules for teacher preparation in the area of autism spectrum disorders. It is appropriate for educators with elementary or secondary certification with a teaching major in an approved content area.

Master of Education with a major in Special Education and a concentration in Cognitive Impairment—WSU

This program is designed as an endorsement program to meet the Michigan Department of Education Special Education Rules for teacher preparation in the area of cognitive impairment. It is appropriate for educators with elementary or secondary certification with a teaching major in an approved content area. For complete course requirements please refer to the College of Education website at www.coe.wayne.edu.

Master of Education in Special Education/ Learning Disabilities—WSU

This degree prepares professionals to work as teacher consultants and special education teachers in public and private schools. You may also advance to become a supervisor, administrator, or college instructor. For complete course requirements please refer to the College of Education website at www.coe.wayne.edu.

Master of Education in Special Education and a concentration in Learning Disabilities—WSU

This program develops professionals who commit to helping others acquire the knowledge, skills and understanding necessary to participate in and contribute to a complex, changing society. This program is designed as an endorsement program to meet the Michigan Department of Education Special

Education rules for teacher preparation in the area of learning disabilities. It is appropriate for educators with elementary or secondary certification with a teaching major in an approved content area.

Master of Arts in Teaching, Reading & Language Arts—OU

This degree program provides a K–12 State of Michigan endorsement and qualifies certified teachers to serve as reading consultants, reading specialists, and corrective reading teachers.

Education Specialist Certificate with a major in Special Education and a concentration in Autism Spectrum Disorders—WSU

There is a growing demand for well-prepared professional educators who can become tomorrow's effective leaders. An Education Specialist Certification from Wayne State University's College of Education can help you reach your potential for greater job satisfaction, higher earnings, increased responsibility and personal fulfillment. We emphasize diversity, innovation, technology, and state-of-the-art, research-based practices. Our professors are leaders in their fields and provide programs based on nationally recognized standards. For complete course requirements please refer to the College of Education website at www.coe.wayne.edu.

Education Specialist Certificate in Special Education and a concentration in Learning Disabilities—WSU

There is a growing demand for well-prepared professional educators who can become tomorrow's effective leaders. An Education Specialist certificate from WSU's College of Education can help you reach your potential for greater job satisfaction, higher earnings, increased responsibility, and personal fulfillment. We emphasize diversity, innovation, technology, and state-of-the-art, research-based practices. Our professors are leaders in their fields and provide programs based on nationally recognized standards.

ENGINEERING, COMPUTER SCIENCE, TECHNOLOGY

Bachelor's Degrees

Bachelor of Applied Science in Industrial Technology & Management—FSU

The Industrial Technology & Management degree is designed for those involved in any one of a number of areas in manufacturing who may possess many manufacturing or business-related credits or an associate degree, and who desire a bachelor's degree. This degree program will assist persons who want to make a career change with their current employer or a career transition to a new employer. It is designed to assist persons who desire to work in production supervision, sales engineering, production planning, quality, engineering supervision, and project management, among other positions.

The Industrial Technology & Management program is designed to complement previous training in a technical area in order to help individuals move into a management role in a manufacturing or related facility. The degree program is interdisciplinary, bringing components of various programs together with specialty courses that expand the knowledge base of the student in manufacturing and industrial settings. The foundation classes provide depth of knowledge applicable to any technology field with classes in automation, globalization, lean manufacturing, OSHA safety, general management, quality statistics, and industrial operations.

Bachelor of Arts in Information Systems Technology—WSU

This program prepares the student for a challenging workplace with an enhanced knowledge of business applications. The curriculum for this degree is designed to give students fundamental knowledge of computer science with a combined knowledge of system designs and business administration. It will also satisfy most of the prerequisite course work leading to admission in the graduate programs of either Computer Science or Business Administration.

Bachelor of Science in Automotive Management—FSU

This degree concentrates on managerial skills required by the industry. Instruction is provided in the areas of management, sales, marketing, distribution, customer relations, warranty administration, franchising, dealership operations, accounting, financing, and related computer skills.

Bachelor of Science in Computer, Electrical or Mechanical Engineering—OU

- **Major in Electrical Engineering**

Electrical engineering is a broad field

encompassing a number of disciplines.

Oakland University's undergraduate program in electrical engineering is designed to provide students with the basic knowledge and skills for challenging careers in electrical engineering in the coming decades. The curriculum offers strong fundamentals in analog and digital circuits, communications, computers, controls, electromagnetics, electronics including VLSI systems, electronic devices, and power systems. In addition, a strong laboratory component of the program offers numerous design opportunities and allows students to relate theoretical ideas to practical problems using modern equipment and hardware/software tools. The program also provides numerous engineering design experiences.

- **Major in Computer Engineering**

Major technological advances are being made in the computer field at a rapid pace, and it is essential that computer engineering students are not only aware of these advances but prepared to work in this changing environment. Students should gain a strong background in the fundamentals of computer engineering and develop a willingness to accept and thrive on change.

The computer engineering program at Oakland University is designed to provide students with the basic knowledge and skills needed to function effectively in computer-related activities in the years ahead. It is unique in offering a focus on wireless embedded systems. A balance between theoretical and practical experience and an emphasis on the software and hardware aspects of computers are key elements to the university's computer engineering major.

- **Major in Mechanical Engineering**

The field of mechanical engineering offers career opportunities in areas such as design, analysis, test development, research and the manufacturing of various products.

Oakland University's mechanical engineering program provides the student with a foundation in the fundamental concepts and principles associated with mechanics of solids, thermodynamics, fluid and thermal energy, materials, manufacturing, design of mechanical systems, electrical circuits, computer programming and software utilization. A strong laboratory experience and the utilization of computers is interwoven through the curriculum. The program also provides numerous engineering design experiences.

Bachelor of Science in Computer Science—OU

This degree program prepares students for professional practice in systems programming, software design and computer applications, or for graduate study in computer science. The program provides a solid foundation based on the organization, processing and display of information. Through choice of minor, students may broaden their areas of expertise to include such diverse subjects as applied mathematics, business applications, management science or other areas that utilize computers in everyday operations.

Bachelor of Science in Computer Science—WSU

A degree in computer science is a pipeline to one of the hottest career fields in today's market. According to the U.S. Department of Labor Statistics, "Computer scientists and database administrators are projected to be one of the fastest growing occupations over the next decade. Strong employment growth, combined with a limited supply of qualified workers, will result in excellent employment prospects for this occupation and a high demand for their skills."

Bachelor of Science in Construction Management—WSU

This degree program was developed collaboratively with Macomb Community College. Students with associate of applied arts in architectural technology, construction technology and civil technology will find transferring to this program easy. This specialization includes coursework in construction project management, estimating, scheduling, safety, legal and professional aspects, specifications, computer applications and a capstone project. Additional courses in accounting, marketing and management complement the program. Co-op and internship opportunities are available.

Bachelor of Arts in Information Systems Technology—WSU

This program prepares the student for a challenging workplace with an enhanced knowledge of business applications. The curriculum for this degree is designed to give students fundamental knowledge of computer science with a combined knowledge of system designs and business administration. It will also satisfy most of the prerequisite coursework leading to admission in the graduate programs of either Computer Science or Business Administration.

Bachelor of Science in Electrical/Electronic Engineering Technology—WSU

Engineering technicians apply principles of engineering, mathematics and science to the operation or testing of engineering and manufacturing systems. An engineering technologist working in research and development often is involved in data collection or may prepare or conduct experiments. They may also participate in design work through the use of computer-aided design systems. Graduates of engineering technology and engineering programs complement each other in their skills and interests.

Bachelor of Science in Mechanical Engineering—WSU

Mechanical engineering is a creative discipline that draws upon a number of basic sciences to design devices, machines, processes and systems that involve mechanical work and its conversion from and into different forms of energy.

Master's Degrees

Master of Science in Engineering Management—WSU

Engineering, manufacturing and service corporations need technical leadership to survive in the global market. The Department of Industrial and Manufacturing Engineering offers a master's in engineering management and a one-year certificate program specifically for high-potential engineers and other technical employees on the management track within their organizations. A graduate certificate is also available.

HEALTH

Bachelor's Degrees

Bachelor of Arts in Nutrition and Food Science—WSU

This curriculum is designed for those interested in non-technical positions in the fields of nutrition and food science. These include sales, food service management, customer relations, etc. Elective courses from the business school or community colleges may be applied. Employment opportunities include school or university food service, industrial and commercial food service, hospitals, nursing homes and extended care facilities.

Bachelor of Science in Health Services Administration (HSA)—UDM

This degree program is designed to educate knowledgeable, multi-skilled current and future health care leaders. The HSA program is designed to prepare individuals for entry and/or middle management or clinical supervisory positions in organizations, institutions and agencies that deliver health services. This is accomplished by providing a strong foundation in management with a depth and breadth of applications to the health care system. The program is accessible to working adults who cannot take time away from jobs and families for full-time study. Students may complete their 126-credit degree in as little as two years. Graduates hold positions such as internal auditor for Medicare Payments, supervisor of Billing and Reimbursement, director of Community Relations, Claims Adjustment supervisor, office manager, and regional manager for Clinic Services. They work for organizations such as Blue Cross and Blue Shield, Hospice of Southeastern Michigan, Trinity Health Corporate Office, HAP, Eli Lilly, Wyeth, and virtually all of the Metro Detroit hospitals.

Bachelor of Science in Nursing (Degree Completion)—UDM

This degree completion program is a flexible option for registered nurses who have completed diploma or associate degree programs. The BSN completion program accommodates learning needs and career goals of the adult learner with minimal repetition of learning experiences. The program supports enhancement and growth through the study of liberal arts and sciences, as well as the study of professional nursing. Competencies needed by BSN-prepared nurses are emphasized, including leadership and management skills, health promotion, risk reduction, illness and disease management strategies for clients, families, and communities, and health care economics. Additional skills include effective use of evidence-based proactive protocol to ensure delivery of cost-effective and appropriate care, use of information technology in clinical settings to manage and make clinical decisions, and care-and case-management strategies with enhanced understanding of health care economics and policies.

Master's Degrees

Master of Health Services Administration—UDM

This degree program is designed to educate knowledgeable, multi-skilled current and future health care leaders. The Masters of Health Services Administration (MHSA) builds on the health-related preparation and work experience that students bring to the program and develops advanced competencies in management, research techniques and fiscal management. Courses are offered in formats designed for the working person. The MHSA program is accessible to working adults who cannot take time away from jobs and families for full-time study. Health care cases and content are fully integrated into each course and health care management texts are used along with Internet resources. The 42-credit master's degree can be completed in five semesters by attending weekend and evening classes. The UDM Masters of Health Services Administration graduate program is distinct from an MBA in that it integrates management theory with specific applications to health care, including topics unique to the field, such as financial management in the context of managed care and third party reimbursement.

Master of Science in Nursing in Health Systems Management (HSM)—UDM

This program prepares the advanced practice nurse to manage and lead the delivery of nursing and health care in multiple settings across the health care continuum. The program will assist nurses in developing the knowledge, skills, and abilities needed to maintain and improve care quality, efficiency, and access. It is designed to prepare nurse leaders who can address contemporary issues in the evolving health care environment. In addition to the Health Systems Management degree program, several certificate options are available in HSM. The certificates require completion of 12 credits and include the Nursing Leadership and Financial Management Certificate and the Outcomes Performance Management Certificate. Those who have completed the certificate program or the HSM program are both eligible to sit for the certification examination in Nursing Administration administered by the American Nurses Credentialing Center (ANCC) or the Case Manager certification exam administered by the Commission for Case Manager Certification (CCMC).

Doctoral Degree

Doctor of Osteopathic Medicine – MSU

The college is dedicated to assisting in the solution of the ever-growing public demand for physicians who can provide comprehensive and continuing health care to all members of the family. While the educational program of the MSU College of Osteopathic Medicine is geared primarily to the training of primary medicine physicians, the curriculum and educational programs are designed also to meet the continuing need for medical specialists and teacher-investigators. Traditionally, osteopathic education seeks to prepare physicians who are especially concerned with maintaining continuing personal relationships with patients, their families, and their optimum interaction with the community environmental patterns. This emphasis is reflected in the nature of the curriculum and particularly reinforced during clinical clerkship rotations through a variety of clinical disciplines in both hospital and non-hospital settings. For more information see <http://www.com.msu.edu/program>.

HUMAN SERVICES

Bachelor's Degrees

Bachelor of Science in Addiction Studies—UDM

The Addiction Studies program educates students in the knowledge and skills required to provide prevention, assessment, referral, and treatment services for individuals and families who suffer from addictive disorders. The curriculum satisfies the prerequisites for the M.A. as well as the education and internship requirements for the Certified Addictions Counselor credential (CAC) awarded by the State of Michigan.

Bachelor of Science in Community Development (BSCD)—CMU

This degree program is designed for people interested in working in the public sector or human services areas. Graduates are prepared for careers as city, county, state, or federal administrators; agency managers; public health professionals; community education directors; and more.

Bachelor of Science in Counseling Psychology—RC

This degree program is designed for adults pursuing a career in a mental health field. Most students who complete this program will choose to continue on to graduate school for further training toward licensure as a psychologist, psychotherapist, professional counselor, or social worker. Although this program meets the preparatory needs of most graduate schools, students should consult the graduate school of their choice for specific requirements. The Counseling Psychology program is a unique blending of psychology and counseling courses presented from a moral viewpoint with emphasis on the Christian perspective.

Bachelor of Science in Criminal Justice—FSU

This program gives you a general education in criminal justice, but also lets you choose to focus on specific technical skills by enrolling in clusters of courses in the areas of forensic science, communications, accounting, computer information systems, human resource management, Spanish, or social sciences. Coursework is designed to provide an understanding of criminal justice, while allowing you to obtain special work-related skills that will open opportunities in a variety of criminal justice agencies, or pursue the bachelor of science degree with the intent of pursuing further graduate or professional studies.

Bachelor of Science in Criminal Justice—MU

This program offers educational opportunities to pre-service and in-service career persons in law enforcement, corrections, and courts. Since the inception of the criminal justice program in 1972, over 2,200 students have gone through the program, and more than 80 achieved the position of chief or director of their respected law enforcement agency. Students can major in Criminal Justice for law school.

Bachelor of Science in Early Childhood Studies—RC

The Early Childhood Studies degree completion program is for individuals who are currently employed in the early childhood field (Head Start, preschools, daycares, etc.) and is designed to help prepare you for leadership roles. The curriculum focuses on growth and development of young children, the influence of family dynamics, and education patterns of young children. Leadership, reporting, and legal issues are also explored. This program does not qualify for state teacher certification. Regular admission to the program requires completion of an associate degree in Early Childhood and current employment in the early childhood field.

Bachelor of Science in Emergency Management—MU

This program offers students employable skills in preparing, mitigating, responding to, and recovering from natural, man-made, and technological incidents. The course work empowers students to identify, integrate, and allocate resources that exist in the non-profit, private, and public sectors with an emphasis on coordinating with those groups and all levels of governmental response agencies.

Bachelor of Science in Human Resource Development—OU

This degree program is the field of study that supports the use of human development, organization development, training and development, and career development principles and practices to enhance the quality, performance and satisfaction of individuals, groups and organizations.

Bachelor of Social Work—WSU

Education for social workers has been an integral part of this large and respected urban university

for over fifty years, and WSU is proud to offer this program to students living and working at a distance from the main campus. The School of Social Work provides educational offerings at the undergraduate and graduate levels. Its programs are accredited by the Council on Social Work Education. For complete course requirements please refer to the School of Social work website at www.socialwork.wayne.edu.

Master's Degrees

Master of Arts in Counseling (two-track options: school and community/agency) – OU

This degree program is dedicated to educating and preparing individuals to work as professional counselors with children, youth and adults in school or community settings. The curriculum is designed to encourage both personal and professional development of students. Initial courses introduce theoretical and professional components of counseling. Later courses emphasize research and clinical counseling skills. Students are supervised as they apply their knowledge in clinical courses that use on-campus laboratory facilities and approved field training sites.

Master of Arts in Employment and Labor Relations – WSU

Students gain a broad understanding of human resources and labor relations in the workplace.

The relationship between employees, employers and labor unions is examined, and much attention is given to the role and dynamics of collective bargaining, human resource management, and

labor-management relations. The pivotal areas of effective resolution of disputes and management of performance issues also will be explored. This curriculum ensures that students master the requisite analytical and practical skills for attaining leadership positions in business, government, labor and not-for-profit organizations. The flexible design of the program allows students to choose electives in focus areas of human resources, public sector, dispute resolution, and union management.

Master of Social Work – WSU

Wayne State University offers students the opportunity to attend classes toward a master's degree in Social Work at the University Center. Summer bridge courses and advanced year courses are offered for students admitted to the MSW program with Pre-Candidate Master's (Advanced Standing) Status or who have completed the core curriculum. Please note, not all courses will be available at the University Center. For additional information regarding course offerings, please consult the WSU course schedule online at www.classschedule.wayne.edu. For complete course requirements please refer to the School of Social Work website at www.socialwork.wayne.edu

FREQUENTLY ASKED QUESTIONS

How do I apply?

Courses offered at the University Center are third- and fourth-year and graduate level only. You must have the appropriate level of college credits—a minimum of 60 for most bachelor's degree programs—before you're eligible to transfer to be admitted. Completion of an undergraduate degree is the minimum requirement for admission to master's and doctoral degree programs.

To apply to a bachelor's degree program:

1. Enroll at Macomb Community College and later apply to transfer to the University Center partner of your choice.
2. Enroll directly at the senior institution if you've completed the lower-division credits.

If you're a current Macomb student and plan to attend the University Center, contact a Macomb adviser. That way, you'll know your community college credits will transfer.

To apply to a master's degree or Doctor of Osteopathic Medicine degree program:

Apply directly to the college or university offering the degree.

Can I afford it?

Each of our partner institutions sets its own tuition rate—and you may be eligible for financial aid or tuition reimbursement from your employer. You can find tuition rates by clicking onto our website www.macomb.edu and then linking to the University Center partner; or, by calling the partner directly.

To apply for financial aid, a student must submit a Free Application for Federal Student Aid (FAFSA), which is available from Macomb's Financial Aid Offices, Macomb's website www.macomb.edu, as well as the Financial Aid Offices of the University Center partners. Each of these offices will also provide information about specific financial assistance or scholarship opportunities available through their particular institution.

How long will it take to finish?

For most programs, partner institutions schedule their courses with sufficient frequency so that students can complete their degree in two to three years. A variety of course formats are offered for some programs, including accelerated or online class options. Some students opt for one course each semester. Others hop on the fast-track and take more than one course a term. The University Center's programs provide the flexibility you need to fit your schedule.

How do I register for classes?

You can register on site or in most cases by web, phone or mail. See the University Center Schedule of Classes for each institution's registration calendar.

Where can I find more answers?

We're happy to answer your questions—in person, on the phone, or online. For more information about the University Center, its programs, and admission and enrollment procedures, call the college or university, or Macomb's Information Center toll free at 866.Macomb1. Visit us online at www.macomb.edu.
