Higher Education Partnerships in Macomb County

University
Center

MACOMB COMMUNITY COLLEGE

Discover. Connect. *Advance.*SM

The Macomb University Center (UC) was the first of its kind—anywhere. The concept: In partnership with 10 four-year institutions, you can complete a bachelor's, master's or doctoral degree in nearly 50 programs—right on Macomb Community College's Center Campus.

The Macomb University Center opened in 1991 to meet the needs of people like you: ambitious, focused on your career, ready to add to your credentials, and eager to move ahead professionally.

Most of all, the UC responds to reality: You're busy, and a degree program that fits your schedule and is conveniently located is a real benefit. On average, UC students work 38 hours per week. They include men and women in the process of a career change, professionals who have reached a career plateau, and individuals who want to move up the career ladder.

Every degree program offered is designed to provide the fundamentals needed for success. The partnership brings together Macomb Community College and the prestige 10 of Michigan's leading colleges and universities:

- Central Michigan University
- Ferris State University
- Madonna University
- Michigan State University
- Northwood University
- Oakland University
- Rochester University
- University of Detroit Mercy
- Walsh College
- Wayne State University

Macomb provides technology-rich facilities and the resources you need to succeed, and our partner institutions provide the faculty and the curriculum. When you enroll, your financial obligation will be to that institution and your degree will be awarded from that institution as well.

In 2009, the Macomb University Center became home to an expansion site of the Michigan State University College of Osteopathic Medicine (MSUCOM). The MSUCOM at the UC provides the first two years of an osteopathic physician's education.

Your best source of information for transferring to a Macomb University Center partner is to contact the institution you wish to attend. Each partner has an office located in the Macomb University Center; or, if you are a Macomb student, our counselors and advisors can assist you.

In this catalog you will find information about each partner and their programs and courses offered at the University Center.

Still have questions?

Check out the FAQs listed on page 25 or feel free to contact us at 866.Macomb1 or visit www.macomb.edu/transfer.

Central Michigan University

CMU

CENTRAL
MICHIGAN UNIVERSITY

Central Michigan University, Michigan's fourth-largest state university, founded in 1892, offers several undergraduate and graduate programs at the Macomb University Center.

Programs Offered

Bachelor's Degrees

- Bachelor of Science in Administration with a concentration in Ergonomics Administration or Personnel Administration
- Bachelor of Science in Community Development with a concentration in Public Administration, Health Sciences or Community Services

Master's Degrees

- Master of Science in Administration with a concentration in Digital Management, Emergency Management and Homeland Security, General Administration, Health Services, Human Resources, International Administration, Leadership, Logistics and Acquisitions, Project Management or Public Administration

Admission

There are three convenient ways to apply for admission:

1. Apply online at fireup.cmich.edu/apply
2. Request information and application to be mailed
 - Information Packet Request
 - Call 800.950.1144

You must be admitted to the university before you can begin taking classes. A \$40 nonrefundable undergraduate or \$50 graduate application fee is required in order to complete the application process. The application fee can be either paid online with a credit card or electronic draft, or mail payments to:

Central Michigan University, Application Processing
802 Industrial Drive
Mount Pleasant, MI 48858

CMU must have one official transcript from each of the institutions you've attended.

Registration

Complete your application to CMU at <https://fireup.cmich.edu/apply/>

Once admitted, all course registration, orientation and financial transactions can be managed through your student portal.

Tuition and Payment Information

Visit www.cmich.edu/academics/innovation-online/cmuhonline/tuition-fees for current tuition rates, fees and payment options.

Refund Policy

For students to receive a 100% refund they MUST drop the course prior to the start date. A \$50 fee will be assessed and refunds will be prorated after the second class meeting. For more information, visit <https://www.cmich.edu/offices-departments/registrars-office/registration-information-request-forms/drop-withdrawal-information>.

The MSU College of Osteopathic Medicine provides world-class, osteopathic, student-centered medical education to prepare physicians in the science of medicine, the art of caring and the power of touch, with a world view open to all people.

Doctor of Osteopathic Medicine—MSU

The MSU College of Osteopathic Medicine is dedicated to addressing the ever-growing public demand for physicians who can provide comprehensive and continuing health care to all members of the family. While the educational program of the MSU College of Osteopathic Medicine is geared primarily to the training of primary medicine physicians, the curriculum and educational programs are designed to meet the continuing need for medical specialists and teacher investigators.

Traditionally, osteopathic education seeks to prepare physicians who are especially concerned with maintaining continuing personal relationships with patients, their families, and their optimum interaction with the community environmental patterns. This emphasis is reflected in our curriculum and particularly reinforced during clinical clerkship rotations through a variety of clinical disciplines in both hospital and non-hospital settings. For more information, see <http://www.com.msu.edu>.

Michigan State University College of Osteopathic Medicine—MSUCOM

As of July 2009, the Michigan State University College of Osteopathic Medicine has been conducting courses at three sites: East Lansing, Detroit, and at the Macomb University Center.

Admission

Admission to MSUCOM requires competitive undergraduate science grade point average, MCAT, clinical experience, including physician shadowing, as well as evidence of volunteerism and other requirements. Virtually all applicants hold at least a bachelor's degree. Preadmissions counseling is highly recommended.

For full up-to-date information, see <http://www.com.msu.edu/admissions/>.

MSU College of Osteopathic Medicine courses are only available to students who are enrolled at MSUCOM.

Program

- Doctor of Osteopathic Medicine (D.O.)

At Northwood University, we believe the best investment is the one you make in yourself.

In today's fast-paced business world, earning a degree from a regionally accredited university is essential. You work, organize and lead, not only in business but personally as well. Northwood's Adult Degree Program provides the flexibility you need to succeed in your educational goals. Our specialized business degree programs allow you to combine evening, weekend and online courses to fit your schedule. Classes begin every eight weeks.

Programs Offered

Bachelor's Degrees

- Bachelor of Business Administration in Automotive Marketing & Management
- Bachelor of Business Administration in Cybersecurity Management
- Bachelor of Business Administration in Entrepreneurship
- Bachelor of Business Administration in Hospitality Management
- Bachelor of Business Administration in International Business
- Bachelor of Business Administration in Sports Management

Admission

Admission applications can be completed online at <https://apply.northwood.edu> (it's free to apply!). Official transcripts and a resume will also be reviewed before an admission decision is made.

Registration

Students can register for classes using WebAdvisor. Login information will be sent to students once they have been accepted. The Program Center Manager can also assist students with first-time registration.

Tuition and Payment Information

Tuition for Northwood's Adult Degree Program is \$480 per credit hour (\$1,440 per course). Tuition is due two full weeks before courses start.

Textbooks

Available 7 days prior to start date. Students may purchase textbooks online from <https://www.bkstr.com/northwoodstore/home>

Transferability

Northwood University's agreement with Macomb Community College allows up to 92 credits to transfer, which helps keep tuition costs down. Students utilizing financial aid may also take advantage of the Consortium Agreement between Macomb and Northwood, which allows concurrent enrollment so students can work on earning an associate and bachelor's degree at the same time. Students not utilizing financial aid are also able to take advantage of concurrent enrollment to complete a degree quicker.

Academic Calendar

As Michigan's largest independent university, Detroit Mercy has an outstanding tradition of academic excellence, firmly rooted in a strong liberal arts curriculum.

This tradition dates back to the formation of the two Detroit institutions: the University of Detroit, founded in 1877 by the Society of Jesus (Jesuits); and Mercy College of Detroit, founded in 1941 by the Religious Sisters of Mercy. In 1990, these schools consolidated to become Detroit Mercy—a university dedicated to providing affordable, accessible, quality education, while meeting the career preparation needs of a diverse student population.

Programs Offered

Bachelor's Degrees

- Bachelor of Science in Health Services Administration

Bachelor's to Master's Degree

- Accelerated 3-year Bachelor's to Master's in Health Services Administration

Master's Degrees

- Master of Science in Health Services Administration

Admission

Please complete a free application online at www.udmercy.edu/apply. The application fee is waived.

Registration

Complete information on class schedules, payment methods and registration procedures is available at www.udmercy.edu. New students must see their academic advisor prior to registration.

Walsh College is one of Southeast Michigan's largest graduate business schools, offering undergraduate, graduate and doctoral business and technology degrees, as well as graduate certificate programs in cybersecurity, data analytics, project management, human resources, business communication, and other fields.

Our internationally and nationally ranked programs integrate theory and application to prepare graduates for successful careers. Classes are taught by academic faculty with real-world experience, giving you the knowledge and skills to succeed in a global market. For maximum flexibility, classes may be taken online, on ground at one of our locations, or a combination of each. 100% online programs are also available. Whether you attend online or on ground, you will receive personal attention in small class settings. Year-round registration lets you plan your entire academic year in advance.

Programs Offered

Bachelor's Degrees

- Bachelor of Accountancy
- Bachelor of Business Administration in Finance
- Bachelor of Business Administration in General Business
- Bachelor of Business Administration in Management
- Bachelor of Business Administration in Marketing

Admissions and Transfer Information

Apply online at www.walshcollege.edu/applynow. Appointments are available to meet with Walsh advisors virtually, by phone, and onsite including at the Macomb University Center. For complete information about admission requirements, policies and degree programs, view the catalog online at www.walshcollege.edu/student-services or visit www.walshcollege.edu/future-students.

At the bachelor degree level, everyone transfers to Walsh. We offer the junior- and senior-level coursework leading to a bachelor's degree. Unlike most business schools, Walsh allows transfer of up to 90 semester credit hours. Walsh offers the Walsh Now program allowing students to concurrently enroll at both Macomb and Walsh to maximize transfer credits. Walsh also participates in the Michigan Transfer Network and MiTransfer business pathways agreements.

Read more at www.walshcollege.edu/transfer.

Registration

Walsh offers four semesters per year and year-round registration. Register early to reserve your classes.

Wayne State University (WSU) is a leading urban research institution and has been a symbol of excellence in higher education for 150 years.

Programs Offered

Undergraduate

- Bachelor of Science in Business Administration with a major in Global Supply Chain Management (Offered at ATEC/South Campus)*
- Bachelor of Arts in Nutrition and Food Science
- Bachelor of Arts in Public Relations
- Bachelor of Science with a major in Computer Science (Offered at ATEC/South Campus)*
- Bachelor of Science in Construction Management Technology (Offered at ATEC/South Campus)*
- Bachelor of Science in Electrical/Electronic Engineering Technology (Offered at ATEC/South Campus)*
- Bachelor of Science in Mechanical Engineering (Offered at ATEC/South Campus)*

* Classes are held at the WSU Advanced Technology Education Center, 14601 E. 12 Mile Road in Warren.

Admission

Applications for admission to WSU are available online at apply.wayne.edu.

Wayne Advantage-Macomb

Wayne Advantage-Macomb allows you to seamlessly move between Macomb Community College and Wayne State, preparing you to pursue a bachelor's degree while completing your associate degree at Macomb. As a Wayne Advantage-Macomb student, you can concurrently enroll at WSU and Macomb, giving you a head start on your bachelor's degree while you save money, familiarize yourself with Wayne State and meet with faculty and advisors who can help you make a smooth transition between both institutions.

When you enroll in Wayne Advantage-Macomb, you're officially admitted to Wayne State, which means you can take courses at Macomb, WSU or both institutions in the same semester. Wayne State offers hundreds of courses at a variety of times and locations, including several at WSU extension centers in Warren and Clinton Township—within walking distance of Macomb's South and Center campuses. Financial aid is also available for qualified students enrolled at either institution.

Benefits

- Schedule coordinated academic advising from both institutions in your program of interest
- Receive support for academic and career success from both institutions, including tutoring, workshops, job opportunities and professional planning
- Access the Macomb and WSU library systems for research and course preparation
- Enroll in Study Abroad programs
- Join academic Learning Communities
- Participate in WSU events and student organizations
- Use your WSU OneCard for everything from paying for parking and printing to purchasing a meal
- Live on the WSU campus

Note: Some benefits only available if you are currently enrolled in WSU classes. To learn more and apply, visit go.wayne.edu/wayne-advantage.

Arts & Sciences

Bachelor's Degrees

Bachelor of Integrative Studies—OU

The Bachelor of Integrative Studies (BIS) degree is a university-wide degree program that enables students to custom design their own plan of study. The BIS degree integrates coursework from multiple disciplines to prepare students for academic and professional goals in a world that increasingly bridges academic disciplines.

The program weaves flexibility and decision making into an opportunity for students to achieve unique personal and career goals. Students in the program have clearly identified educational goals and academic needs that can be achieved better through the BIS degree than through a traditional major.

Bachelor of Science in Mass Communication—RU

The Bachelor of Science in Mass Communication degree-completion program provides you with a unique educational opportunity through a partnership between Rochester University and Macomb Community College.

The program incorporates training in Macomb's AAS Media and Communication Arts program with in-depth explorations of theory and scholarship in media at Rochester University.

The curriculum is designed to help you expand your understanding of communication and develop essential skills needed to succeed and advance within the media industry.

It is encouraged that students interested in Mass Communications with a track in Marketing complete a degree within Macomb's Media and Communication Arts (MACA) program.

Visit www.macomb.edu for more information on the MACA program at Macomb Community College.

Bachelor of Arts in Public Relations—WSU

Public relations is an exciting and challenging field that demands individuals with excellent communication skills. Most public relations classes are taught by faculty who have professional experience in addition to their academic training. The practical applications of ethics are carefully considered. The program pays special attention to effective written and oral communication as well as developing a fundamental understanding of human communication and research methods. For complete course requirements, please refer to the College of Fine and Performing Arts website at www.cfpa.wayne.edu.

Business

Bachelor's Degrees

Bachelor of Accountancy (BAC)–Walsh

Walsh is a nationally recognized leader in accounting education. That's why you'll find our graduates in nearly every Fortune 500 company in Michigan. A Walsh Bachelor of Accountancy (BAC) equips you to think analytically, solve problems efficiently and communicate effectively. Our graduates go on to earn their certifications as CPAs, CMAs or business accountants. Walsh students continue to have a high CPA pass rate and our concentrations prepare you with skills and knowledge to sit for the CPA or CMA exams. <https://www.walshcollege.edu/bachelors-ba-degree-accountancy>

Bachelor of Science in Administration–CMU

A major in Administration with a concentration in Ergonomics provides knowledge in the areas of manufacturing and production, global management strategy, quality and safety, lean manufacturing, project management and more. You'll gain the experience and know-how necessary to lead and help organizations manage their raw materials inventory, control quality, and implement efficient production processes within the manufacturing sector. The courses prepare you to earn industry-recognized credentials in project management and manufacturing (Lean Six Sigma-Yellow and Green Belt).

A major in Administration with a concentration in Personnel provides competencies, skills, and business acumen in communication, the legal environment of business, public relations, human resource management, digital literacy and more to thrive in an administrative capacity in a number of organizational settings. To be a successful administrative professional, you are a "Jack-of-all-trades." That's because one day, you might be collaborating with coworkers to ensure a project is finished by an approaching deadline. Another day you might be creating a company-wide memo on behalf of leadership. On another day, you might be resolving an interpersonal conflict between officemates using your emotional intelligence.

Bachelor of Business Administration in Automotive Marketing & Management–NU

This program provides the student with a well-rounded education in management for the automotive industry. This degree is well-suited to individuals who are looking to advance into management or leadership careers. The Automotive Marketing and Management program is designed to integrate a foundation of business education and expertise that prepares graduates for a variety of automotive industry careers. Northwood is the only university that specifically prepares students for this expansive industry. The bachelor's degree in Automotive Marketing and Management focuses on the various aspects of the automotive marketing function, including dealership advertising, finance and insurance, budgeting and forecasting, parts and service and used car management.

Bachelor of Science in Business Administration with a major in Global Supply Chain Management–WSU

Every successful organization owes a portion of its success to effective supply chain management and logistics. These processes focus on the production and distribution of goods and services. The market in which organizations compete has become increasingly global as it works with nondomestic suppliers, outsource business functions, and market goods and services to consumers around the world. Business leaders realize that a sustainable approach to managing global supply chains plays a significant role in achieving success. They need well-qualified supply chain professionals to meet the challenges and recognize opportunities. www.business.wayne.edu.

Bachelor of Science in Business Administration–FSU

The major in Business Administration is designed to prepare students for the rapidly changing nature of the work environment in business, government, and other nonprofit organizations. The program is designed to equip graduates not only for entry-level positions, but also for advancement as well. Building upon a core of business courses, the program features a tight sequence of major courses; however, the program also provides the flexibility to specialize in an area of interest for the student. The goals of this program are: to provide students a broad-based business education that will widen the field of start-up positions open to them upon graduation, to provide a solid undergraduate curriculum for those who intend to go to graduate school, and, finally, to establish a foundation for long-term career flexibility in a fast-paced and ever-changing competitive world. To these ends, the Business Administration Degree Program incorporates a combination of core business courses and application-oriented courses, concentrations that allow students to pursue specific areas of interest, internship opportunities, active student engagement opportunities, and faculty with real-world experience.

Bachelor of Science in Business Administration–Professional Track–FSU

This program will prepare you for the rapidly changing nature of the work environment in business, government and other nonprofit organizations and equip you with the skills you need for entry-level positions as well as advancement.

Building upon a core of business courses, the program features a tight sequence of major courses; however, the program also provides the flexibility to specialize in an area of business administration for the student. Students with associate degrees in occupational, technical or professional fields will find the program attractive for building a solid knowledge of business and management upon their technical expertise. The major is also valuable as preparation for law school, as well as for graduate studies in business.

Bachelor of Business Administration in Cybersecurity Management—NU

The Bachelor of Business Administration in Cybersecurity Management at Northwood University provides students with an opportunity to gain the knowledge, ability and skills needed to enter the fast paced and growing field of cybersecurity. Due to increased risk and threats of cyberattacks, organizations are taking it upon themselves to identify these attacks and the risks they face. This rigorous program will provide the knowledge and skills necessary for graduates to meet industry demands.

Graduates of Northwood University's Bachelor of Business Administration in Cybersecurity program will master the fundamentals of cybersecurity. Graduates will be able to evaluate current trends, practices, methodologies and products related to cybersecurity. Graduates will also be able to assess risk and develop risk management strategies and policies. Lastly, graduates will be able to design secure information systems.

Bachelor of Business Administration in Entrepreneurship—NU

This program provides the student with a well-rounded education in business enterprise models and entrepreneurial bases. By combining a rigorous academic curriculum, leadership development, experiential learning and relationships with industry leaders, graduates prepare to become tomorrow's entrepreneurs. Northwood University was founded on the principle that America's free enterprise system, together with an entrepreneurial spirit, can create a bigger pie for all to share. We believe the entrepreneurial spirit can and should be taught to all generations, as it is the foundation of a free society. Within a few years after graduation, 25% of Northwood University graduates become business owners.

Bachelor of Business Administration (BBA)—Walsh

The Walsh Bachelor of Business Administration bridges real-world understanding with a nationally ranked business curriculum. You'll gain a strong, comprehensive business foundation, giving you the knowledge and the skills you need to elevate your career. 95% of Walsh faculty have real-world experience that they bring right into the classroom. Majors available in Finance, General Business, Human Resource Management, Management and Marketing. Accelerate your degree with the FastTrack program and earn your bachelor's and master's degrees in as little as five years. Meet with a Walsh advisor to learn more. <https://www.walshcollege.edu/bachelors-bba-degree-business-administration>

Bachelor of Science in General Management (Fast Track)—OU

A versatile credential, the general management degree offers students the opportunity to gain knowledge in all aspects of business, equipping them for success in any position or industry. Gaining fluency in business fundamentals combined with real-world experiences prepares students for professional careers as well as graduate programs.

The general management degree prepares you to get started in business while you explore a range of career options. There's no better place to explore than Oakland University. We're deeply enmeshed in Southeast Michigan's rich business ecosystem, which supports a full spectrum of career opportunities. The general management major equips you with a versatile skill set that has real value in the 21st-century economy, enabling you to adapt quickly as industries and technologies evolve. You'll graduate with a management degree from one of the nation's top business schools, along with professional experience and skills that give you a real advantage in the job market.

Bachelor of Business Administration in Hospitality Management—NU

Whether your dream is to manage a large hotel chain, lead a kitchen crew, plan major events, have an office on a cruise ship or run your own bed and breakfast, a Hospitality Management degree from Northwood will help you launch your career the moment you step on campus.

With major courses starting from day one in the classroom, you'll get crucial learning experiences in the real world. You'll have the opportunity to learn event management, marketing and financial planning by participating in large student-run events such as the Stafford Dinner and Northwood University International Auto Show (NUIAS). Gain valuable real-world experience by helping run the N.A.D.A. Hotel & Conference Center on our Midland, Michigan, campus.

Hospitality is one of the largest and fastest-growing industries in the world, and we're here to help build its future leaders. If you think you're one of those, apply at <https://admissions.northwood.edu/apply>

Bachelor of Science in Human Resource Management (Fast Track)—OU

The major in Human Resource Management develops the skills needed to administer the personnel functions of organizations. It is designed primarily for students who intend to pursue careers in administration, personnel management, labor relations or wherever the management of people at work is a central concern. Emphasis is placed on developing an intensive understanding of the concepts and techniques needed to acquire, develop and utilize an organization's human resources. The program includes broad coverage of such topics as personnel psychology, personnel administration and labor/management relations, in addition to providing basic knowledge of organizational behavior.

OU's Human Resource Management program is certified by the National Society of Human Resource Management (SHRM). SHRM also recognizes OU's HR Management degree program as an academically aligned partner, indicating it as a top choice for students seeking a career in human resources. Students enrolled in SHRM Academically Aligned programs have the opportunity to earn their SHRM-CP credential prior to graduating, giving them a competitive advantage in the job market.

Bachelor of Business Administration in International Business—NU

This program provides the student with a well-rounded education in the emerging global business environment. By combining a rigorous academic curriculum, leadership development, experiential learning and relationships with industry leaders, graduates prepare to become the future leaders of the competitive global marketplace. Crossing borders increases the complexity of business, and with increasing globalization, businesses require individuals who can work in an international environment. In addition to learning policy and management strategies, students will achieve proficiency in a foreign language. With such extensive preparation, Northwood graduates launch careers in fields such as import/export management, economic development, international marketing and international telecommunications.

Bachelor of Business Administration in Sports Management—NU

Sports and entertainment aren't all fun and games. They're also serious business, and if you want to succeed it helps to have an entrepreneurial spirit coupled with a strong understanding of how businesses in this highly competitive and fast-paced world operate. Our Sports Management degree program teaches you what it takes to thrive in the business of sports and entertainment. You'll learn about operations, marketing, accounting, economics and other financial aspects specific to this industry. You'll also graduate prepared to work in concert and tour management, marketing and community relations, operations, tourism, broadcasting and even facilities operations.

Bachelor of Science in Strategic Leadership—RU

This program integrates management and leadership courses to provide a comprehensive perspective of leadership that may be applied across a variety of disciplines and industries. The program is designed to provide students a broad-based degree that establishes a foundation for future graduate work and professional advancement.

Master's Degrees

Master of Science in Administration (MSA)—CMU

This degree is a 36-semester-hour degree program that provides the knowledge and skills required for administrators and supervisors to function more effectively in a wide variety of administrative settings, plus the specialized processes and competencies needed for a particular professional field. GMAT or GRE entrance examinations are not required. If you are interested in upgrading your credentials, but not sure that you want to earn a complete master's degree, you can opt for a graduate certificate from CMU. Each of the MSA concentrations is available as a graduate certificate and include Digital Management, Emergency Management and Homeland Security, General Administration, Health Services, Human Resources, International Administration, Leadership, Logistics and Acquisitions, Project Management or Public Administration. You can apply credits earned in the certificate program to the MSA degree if the concentration is the same.

Education

Bachelor's Degrees

Bachelor of Science in Early Childhood Studies—RU

The Early Childhood Studies degree-completion program is for individuals who are currently employed in the early childhood field (Head Start, preschools, daycares, etc.) and is designed to help prepare you for leadership roles. The curriculum focuses on the growth and development of young children, the influence of family dynamics, and education patterns of young children. Leadership, reporting and legal issues are also explored. This program does not qualify for state teacher certification.

Bachelor of Science in Elementary Education—OU

The Bachelor of Science in Elementary Education program prepares high-quality teachers for schools in the state of Michigan and throughout the country. Students completing this program concurrently earn a Bachelor of Science degree and recommendation for a Michigan Standard Teaching Certificate in elementary education with dual grade band endorsements for PK–3 and 3–6. Students who hold a bachelor's degree can pursue the program as second degree undergraduates. The Teacher Education Accreditation Council (TEAC) approves the Teacher Development and Educational Studies (TDES) undergraduate elementary education program, and our graduates are recognized throughout the state for the quality of the preparation they receive at Oakland University. The professional portion of the OU Elementary Education program is offered in its entirety at the Macomb University Center in a cohort format.

Master's Degrees

Master of Education in Educational Leadership (Accelerated Weekend Format)—OU

The M.Ed. in Educational Leadership is designed to prepare “practice-ready” leaders for 21st-century schools. With the guidance of expert faculty and supported by a summer internship, students develop the skills needed to lead with a clear vision, build positive relationships, support and guide school improvement, and empower others while managing the complexities of change. The accelerated, weekend format offered at the Macomb University Center in Clinton Township is designed for tenured teachers or those with four or more years’ experience and aspire to assume a variety of school leadership positions.

Education Specialist

Education Specialist in Leadership (Accelerated Post-Master's Degree)—OU

The Education Specialist Degree (Ed.S.) in (K–12) Leadership is a 34-credit, cohort-structured, post-master's degree program designed for individuals who are looking to further their education and aspire to positions in education administration. The curriculum is relevant –aligning instruction with the true experience in leadership—and connects with current issues in K-12 education. Students may apply for the Administrator Certificate (Building Level). Twenty-eight credits earned in the Ed.S. program can be applied toward Oakland University's Ph.D. in Education and 20 credits can be applied to the Ed.D. in Organizational Leadership. Classes are taught with face-to-face, hybrid and 100% online cohort modules available.

Engineering, Computer Science, Technology

Bachelor's Degrees

Bachelor of Science in Automotive Management—FSU

The Automotive Management program is a baccalaureate degree that focuses on providing the transportation industry with state-of-the-art technical and business managers for service, parts, sales, leasing, warranty and customer relations positions. Opportunities exist with car, truck, equipment and component manufacturers; suppliers; dealers; fleets; insurance companies; the aftermarket; and local and federal government agencies. The program prepares graduates to provide knowledgeable, skilled, world-class customer service, and for careers in the service sector.

Bachelor of Science in Mechanical Engineering—OU

The field of mechanical engineering offers career opportunities in areas such as design, analysis, test development, research and the manufacturing of various products.

Oakland University's mechanical engineering program provides the student with a foundation in the fundamental concepts and principles associated with mechanics of solids, thermodynamics, fluid and thermal energy, materials, manufacturing, design of mechanical systems, electrical circuits, computer programming and software utilization. A strong laboratory experience and the utilization of computers are interwoven throughout the curriculum. The program also provides numerous engineering design experiences.

Bachelor of Science in Computer Science—WSU

A degree in computer science is a pipeline to one of the hottest career fields in today's market. A high-quality, innovative education focusing on the fundamentals of computer science while emphasizing technology, prepares students for employment and advanced studies. Students receive guidance and can pursue research opportunities in many areas, including artificial intelligence, bioinformatics, networking and wireless networking, databases, distributed and parallel computing, security, graphics and visualization and software engineering.

A recently revised curriculum includes a high degree of hands-on experience with real-world systems, increased personal attention, undergraduate participation in research projects, and a carefully crafted progression of course content as students advance through the program. Students also can apply for Study Abroad opportunities at European schools, including the Polytechnic School of Nantes, France.

Bachelor of Science in Construction Management Technology—WSU

This degree program was developed collaboratively with Macomb Community College. Students with an associate of applied science in architectural technology, construction management or civil technology will find transferring to this program easy. This specialization includes coursework in construction project management, estimating, scheduling, safety, legal and professional aspects, specifications, computer applications and a capstone project. Additional courses in accounting, marketing and management complement the program. Co-op and internship opportunities are available.

Bachelor of Science in Electrical/Electronic Engineering Technology—WSU

Engineering technicians apply principles of engineering, mathematics and science to the operation or testing of engineering and manufacturing systems. An engineering technologist working in research and development often is involved in data collection or may prepare or conduct experiments. They may also participate in design work through the use of computer-aided design systems. Graduates of engineering technology and engineering programs complement each other in their skills and interests.

This program is housed at the WSU Advanced Technology Education Center (ATEC) on 12 Mile Road in Warren, across from Macomb Community College's South Campus. ATEC offers state-of-the-art laboratories and advanced classroom settings, and is designed to incorporate new technologies as they emerge in future years. ATEC provides an electric vehicle technologies center of excellence, where WSU and Macomb faculty engage in research, development and delivery of electric and automotive battery technologies.

Bachelor of Applied Science in Industrial Technology & Management—FSU

The Industrial Technology & Management degree is designed for those involved in any one of a number of areas in manufacturing who may possess manufacturing or business-related credits or an associate degree, and who desire a bachelor's degree. This degree program will assist persons who want to make a career change with their current employer or a career transition to a new employer. It is designed to assist persons who desire to work in production supervision, sales engineering, production planning, quality, engineering supervision and project management, among other positions.

The Industrial Technology & Management program is designed to complement previous training in a technical area in order to help individuals move into a management role in a manufacturing or related facility. The degree program is interdisciplinary, bringing components of various programs together with specialty courses that expand the knowledge base of the student in manufacturing and industrial settings. The foundation classes provide depth of knowledge applicable to any technology field with classes in automation, globalization, lean manufacturing, OSHA safety, general management, quality statistics and industrial operations.

Bachelor of Science in Mechanical Engineering—WSU

Mechanical engineering is a creative discipline that draws upon a number of basic sciences to design devices, machines, processes and systems that involve mechanical work and its conversion from and into different forms of energy. The challenge of mechanical engineering may lie in the perfection and reliability of a device that will be duplicated a millionfold or in the control optimization of a single complex system of unique design.

The WSU mechanical engineering curriculum emphasizes human-centered design and the multidisciplinary nature of the curriculum, preparing students for many applied fields. Students have access to the latest research and cutting-edge technology. The hands-on learning environment stems from studying and working under the direction of recognized world experts and engaging in their pioneering research and development. Faculty members are engaged in diverse aspects of the discipline and maintain strong connections to industry, bringing a practical, professional perspective to their lectures and labs. WSU alumni are working in industry research and development; as consultants; hardware engineers; research assistants for the government; mechanical engineers; and manufacturing engineers.

This program is housed at the WSU Advanced Technology Education Center (ATEC) on 12 Mile Road in Warren, across from Macomb Community College's South Campus. ATEC offers state-of-the-art laboratories and advanced classroom settings, and is designed to incorporate new technologies as they emerge in future years. ATEC provides an electric vehicle technologies center of excellence, where WSU and Macomb faculty engage in research, development and delivery of electric and automotive battery technologies.

Health

Bachelor's Degrees

Bachelor of Science in Health Services Administration (HSA)–UDM

This degree program is designed to educate knowledgeable, multi-skilled current and future health care leaders. The HSA program is designed to prepare individuals for entry and/or middle management or clinical supervisory positions in organizations, institutions and agencies that deliver health services. This is accomplished by providing a strong foundation in management with a depth and breadth of applications in the health care system.

The program is accessible to working adults who cannot take time away from jobs and families for full-time study. Students may complete their 120-credit degree in as little as two years. Graduates hold positions such as internal auditor for Medicare payments, supervisor of billing and reimbursement, director of community relations, claims adjustment supervisor, office manager, and regional manager for clinic services. They work for organizations such as Blue Cross and Blue Shield, Hospice of Southeastern Michigan, Trinity Health Corporate Office, HAP, Eli Lilly, Wyeth, and virtually all of the metro Detroit hospitals.

Bachelor's to Master's Degree

Accelerated 3-year Bachelor's to Master's in Health Services Administration (HSA)–UDM

This accelerated degree provides challenging academic coursework that prepares students for a successful career in health services administration: in such sectors as hospital and health systems management, medical groups, pharmaceutical and biotechnology companies, care management organizations, health information technology firms, supply chain companies, government/policy organizations, marketing firms, health insurers, health care management consulting firms.

The program builds on current coursework offered in both programs and eliminates the need for students in the accelerated-degree program to take undergraduate versions of eight graduate courses (20 credits total). The accelerated format allows substantial financial benefits to the students, as well as significantly less time needed to obtain the Master's degree. Transfer students from Macomb can complete the program in a little as three years, provided they satisfy all the requirements stated in the Plan of Study for this accelerated degree.

This fast-track degree is for full-time undergraduate students that become full-time graduate students to combine to be a three-year accelerated program for students transferring from Macomb under the Articulation Agreement with the University of Detroit Mercy. All students must complete at least 142 credit hours, the University Core Curriculum, and all other requirements of the bachelor's and master's programs. Students must maintain full-time status through all parts of the program (excluding some summers if the student is normally on a regular academic year cycle).

Master's Degrees

Master of Science in Health Services Administration (MHSA)–UDM

This degree program is designed to educate knowledgeable, multi-skilled current and future health care leaders. The Master's of Health Services Administration (MHSA) builds on the health-related preparation and work experience that students bring to the program and develops advanced competencies in management, research techniques and fiscal management. Courses are offered in formats designed for the working person.

The MHSA program is accessible to working adults who cannot take time away from jobs and families for full-time study. Health care cases and content are fully integrated into each course and health care management texts are used along with internet resources. The 42-credit master's degree can be completed in five semesters by attending evening and online classes. The Detroit Mercy Masters of Health Services Administration graduate program is distinct from an MBA in that it integrates management theory with specific applications to health care, including topics unique to the field, such as financial management in the context of managed care and third-party reimbursement.

Doctoral Degree

Doctor of Osteopathic Medicine–MSU

The MSU College of Osteopathic Medicine is dedicated to assisting in the solution of the ever-growing public demand for physicians who can provide comprehensive and continuing health care to all members of the family. While the educational program of the MSU College of Osteopathic Medicine is geared primarily to the training of primary medicine physicians, the curriculum and educational programs are designed also to meet the continuing need for medical specialists and teacher-investigators.

Traditionally, osteopathic education seeks to prepare physicians who are especially concerned with maintaining continuing personal relationships with patients, their families, and their optimum interaction with the community environmental patterns. This emphasis is reflected in the nature of the curriculum and particularly reinforced during clinical clerkship rotations through a variety of clinical disciplines in both hospital and non-hospital settings. For more information see <https://com.msu.edu/>.

Human Services

Bachelor's Degrees

Bachelor of Science in Community Development (BSCD)–CMU

This degree program is designed for people interested in working in human services in the public sector. Graduates are prepared for careers as city, county, state or federal administrators; agency managers, public health professionals, community education directors and more.

Bachelor of Science in Criminal Justice–FSU

This program gives you a general education in criminal justice, but also lets you choose to focus on specific technical skills by enrolling in clusters of courses in the areas of forensic science, communications, accounting, computer information systems, human resource management, foreign language or social sciences. Coursework is designed to provide an understanding of criminal justice, while allowing you to obtain special work-related skills that will open opportunities in a variety of criminal justice agencies, or pursue the bachelor of science degree with the intent of pursuing further graduate or professional studies. This program will prepare you for a successful career in law enforcement, corrections, federal agencies, advocacy and more.

Bachelor of Science in Criminal Justice–MU

Criminal justice graduates often find employment in federal, state or local branches of government, law firms or private organizations. Employment possibilities also include Homeland Security (the fastest growing area in federal government), corrections and law enforcement. Madonna's program helps prepare students for careers that involve research, criminal investigation, intelligence, probation and parole counseling, victim-witness or prisoner advocacy, consumer fraud, crime prevention and drug enforcement.

Bachelor of Science in Human Resource Development–OU

With a bachelor of science in Human Resource Development, you will be prepared for administrative and training careers in business and industry, where you can create new ways to train and support employees.

Students complete the core curriculum and have the option of choosing between four areas of emphasis by adding a minor to their degree program. Students can earn a minor in training and development, employment systems and standards, applied leadership skills in addition to earning their bachelor of science in HRD. These minors are also available to any student admitted to the university.

Bachelor of Science in Paralegal Studies—MU

This degree-completion program allows Associate of Applied Science Legal Assistant or Paralegal graduates to receive a Bachelor of Science degree in Paralegal Studies from Madonna University's American Bar Association-approved program. The focus is on legal research and the technology utilized in a modern law practice setting. Students can major in Paralegal Studies for law school.

Bachelor of Science in Psychology—RU

The Psychology program offers you a broad study of human behavior and insight into psychology as a scientific discipline and professional career. As a student of psychology, you will be prepared for graduate studies in psychology, psychotherapy, professional counseling or social work, as graduate work is required to certify for practice in most agencies and for licensure as a private therapist. This program also supports graduate work in experimental, applied, academic, theoretical or professional psychology.

Frequently Asked Questions

How do I apply?

Courses offered at the University Center are third- and fourth-year and graduate level only. You must have the appropriate level of college credits—a minimum of 60 for most bachelor's degree programs—before you're eligible to transfer to be admitted. Completion of an undergraduate degree is the minimum requirement for admission to master's and doctoral degree programs.

To apply to a bachelor's degree program:

1. Enroll at Macomb Community College and later apply to transfer to the University Center partner of your choice.
2. Enroll directly at the senior institution if you've completed the lower-division credits.

If you're a current Macomb student and plan to attend the University Center, contact a Macomb advisor. That way, you'll know your community college credits will transfer.

To apply to a master's degree or the MSU Doctor of Osteopathic Medicine degree program:

- Apply directly to the college or university offering the degree.

Can I afford it?

Each of our partner institutions sets its own tuition rate—and you may be eligible for financial aid or tuition reimbursement from your employer. You can find tuition rates by visiting www.macomb.edu/UC and then linking to the University Center partner; or, by calling the partner directly.

To apply for financial aid, a student must submit a Free Application for Federal Student Aid (FAFSA), which is available from Macomb's Financial Aid Office, www.macomb.edu, or at the financial aid offices of the University Center partners. Each of these offices will also provide information about specific financial assistance or scholarship opportunities available through their particular institution.

How long will it take to finish?

For most programs, partner institutions schedule their courses with sufficient frequency so that students can complete their degree in two to three years. A variety of course formats are offered for some programs, including accelerated or online class options. Some students opt for one course each semester. Others hop on the fast track and take more than one course a term. The University Center's programs provide the flexibility you need to fit your schedule.

How do I register for classes?

You can register onsite or in most cases online or by phone or mail. See the University Center Schedule of Classes for each institution's registration calendar.

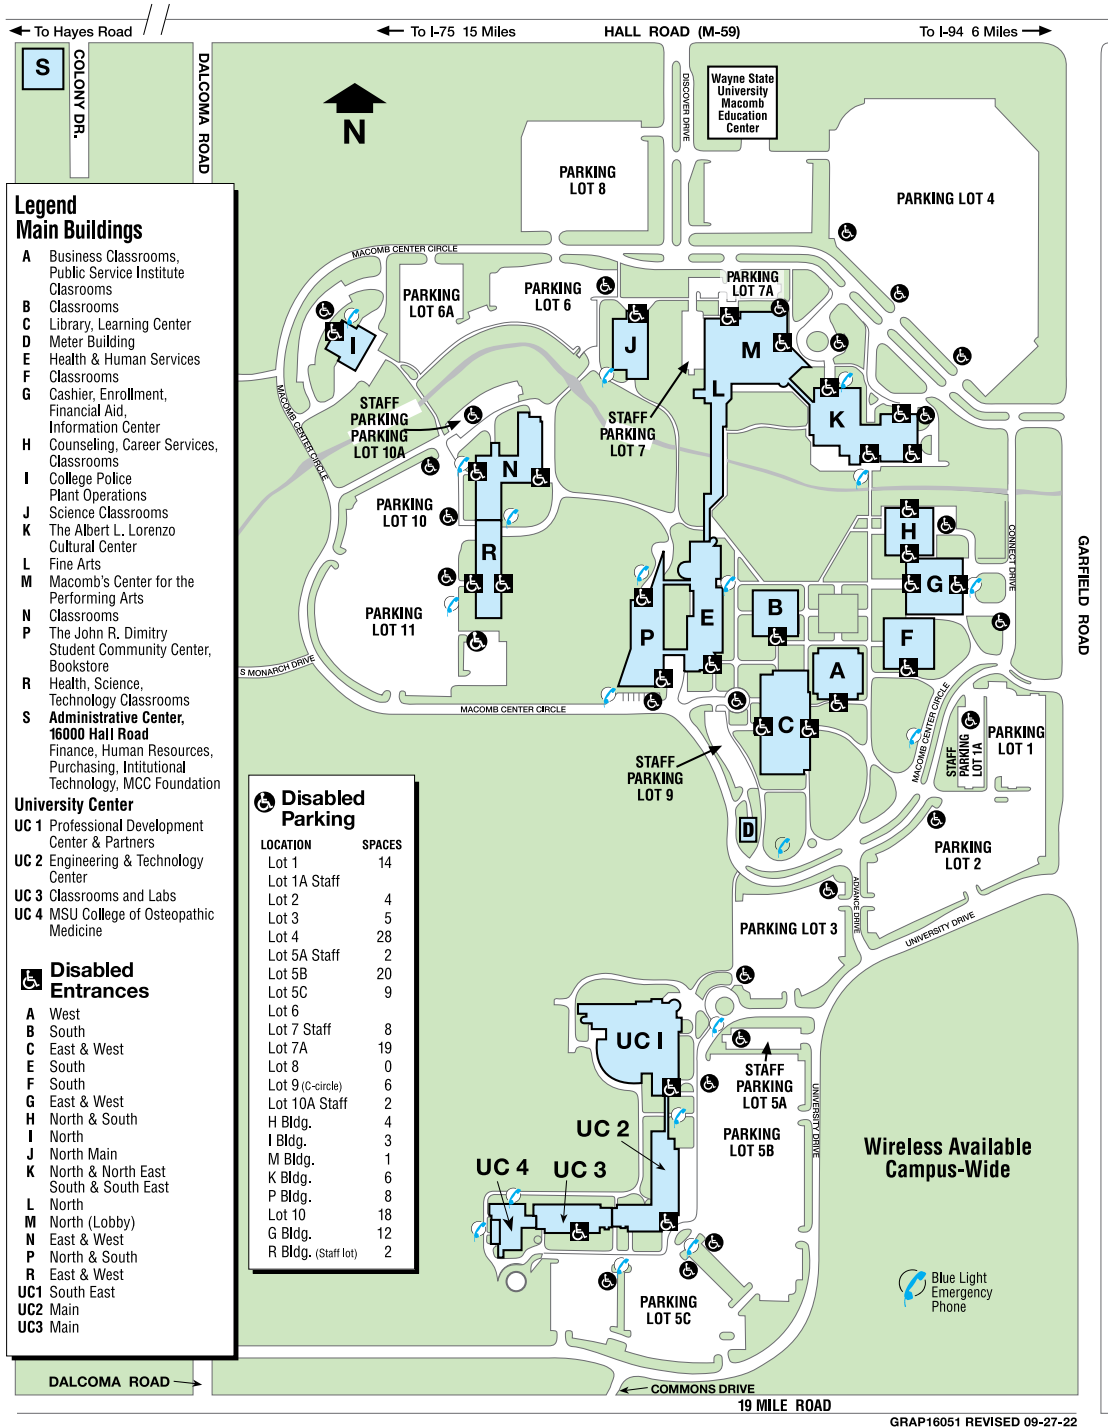

Where can I find more answers?

We're happy to answer your questions—in person, on the phone or online. For more information about the University Center, its programs, and admission and enrollment procedures, call the college or university, or Macomb's Information Center toll free at 866.Macomb1. Visit us online at www.macomb.edu/UC.
