

MACOMB COMMUNITY COLLEGE PETITION FOR ADMISSION TO PARAMEDIC PROGRAM

Student ID _____

Candidate (Print clearly):		
Last Name	First Name	MI
Street Address		
City	State	Zip
Phone Primary	Phone Secondary	
Preferred non-macomb.edu email address		

○ Admission into the Macomb Community College's paramedic programs is granted through the petition process. You will not be able to enroll in the program via general class registration.

Procedure:

Complete this form and submit it either by USPS or scanned and emailed to psi@macomb.edu by **August 14th**. You must include/attach:

- Unofficial college transcript even if you are a Macomb student
- A copy of your State of Michigan Basic EMT license. If you are in the certification process for Basic EMT you can still gain acceptance into the paramedic program, however you must keep the program current on your licensing status, as it will affect your status in the ranking.
- Two (2) letters of recommendation focusing on your character (educators/employers)

All petitions will be reviewed and the applicants will be rated based upon the responses given. The program coordinator will select students for the upcoming classes starting at the highest rated petition and then continuing until the class capacity has been met.

The list of applicants will be retained until after the program start dates. If positions become available, those not previously selected will be offered the opportunity to enroll. The list will not be maintained from year to year.

The program does not discriminate against applicants based upon gender, race, age, religion or region of residence.

Email with reference letters and transcripts as attachments to psi@macomb.edu, or USPS mail to:

Paramedic Petition
Emergency Medical Services, CA-122
14500 E. Twelve Mile Rd
Warren, MI 48088-3896

NOTE: 2020 is the last year in which the petition process will be used. Beginning in 2021 the paramedic program will become a selective admissions program. Contact David Armstrong, armstrongd@macomb.edu, for more information.

Notice of Schedule Modifications for Fall 2021

In order to adhere to social distancing guidelines in the Fall of 2020, several modifications have been made.

Cohort and Section:

The Cohort starting in the Fall of 2020 will be limited to 24 students. The section that standardly runs in the evenings has been eliminated for this year. The Fall semester will be compressed into 12 weeks. During the Fall semester the cohort will only meet on campus in small groups of 8 or less. It is anticipated that the second semester will remain a 16-week semester with fewer restrictions.

Online:

The Fall lecture classes, EMSA 2510 and its following companion EMSA 2550 will be both online and on-campus. Expect 60% of the workload to be online. There will be 3 opportunities for the on-campus meetings, Mondays, Tuesdays, or Wednesdays. You will be allowed to choose from the available class days when you submit all your admission requirements.

The Pharmacology class, EMSA 2520, will be entirely online. You will be expected to complete assignments, discussions, and assessments in a timely manner though they will be asynchronous, you will not have to be online at a scheduled time.

Labs:

The lab class, EMSA 2530, has been broken into 2 3-hour labs. There will be a maximum of 8 students allowed in any section to allow for social distancing. One 3-hour lab will occur in the afternoon following your lecture, the other will occur on an alternate evening. You may not attend both lab classes on the same day; a 12-hour day is not allowed.

Clinical Preparatory Classes:

EMSA 2605 is a 4-week class designed to prepare you for the entrance into the hospital clinical rotations. It will run from the week beginning Sept 14 and run until the week of October 5. After October 5 you may begin your clinical rotations, (depending on hospital availability.)

Hospital Clinical Classes and EMS Internship Class:

The Fall hospital clinical class, EMSA 2611 will begin following your preparatory class, EMSA 2605. The hospital's and EMS agencies' relaxation of social distancing procedures will impact our return and we'll continue to adjust accordingly. You will be given adequate PPE and are expected to adhere scrupulously to all isolation precaution protocols.

Winter Semester:

We anticipate an easing of restrictions by Winter 2021. In that event we will consolidate the small classes into larger ones. You may have to adjust your class schedule then. No other substantive changes in format are expected.
