Take the *Make it in America* Challenge

**Macomb Grant Provides Unemployed Workers
Free Training and Pathway to Four-Year Tech Degree**

Macomb Community College in collaboration with several other organizations is helping local manufacturers **Make it in America** by providing free training to unemployed workers. Learn new skills that will qualify you for a job in one of these high-demand manufacturing fields:

- ◆ CNC Machining
- ◆ Product Design—NX9
- ◆ Multi-Skilled Technician—Mechatronics

And at no cost to you!

Train on the same equipment you will use on the job, gaining both technical knowledge and hands-on experience. This technology-specific training also provides a career pathway to four-year degrees in industrial- and engineering-related fields, increasing the local talent pool in areas which have often had to recruit qualified candidates from other countries, so local companies can **MAKE IT IN AMERICA!**

The Make it in America Challenge Grant seeks to strengthen southeast Michigan's role as a manufacturing and agricultural hub, with a focus on bio-based (composed of biomass products)-related industries.

In addition to the free technical training, Macomb will also provide free job placement assistance.

If you are interested in this opportunity, contact the project manager:

Charles Cammarata: cammaratac00@macomb.edu or 586.445.7425.

Grant Supported Job Training Assistance

Macomb Community College actively pursues state and federal grants and other collaborations that allow it to enhance its programs and provide free or low-cost training and educational opportunities to businesses and individuals.

A private-public partnership administered locally by the
Macomb/St. Clair Workforce Development Board

Funding comes from the Department of Labor/Employment and Training Administration.
