

Architectural Technology

at Macomb Community College

Why Architecture?

How a building will be used is the driving force behind Architectural Technology. While residential architecture caters to the similar needs of individuals and families, commercial architecture must meet the much more diverse needs of business.

Regardless of which path you choose, architecture gives you an opportunity to improve the way society lives and works by contributing to the design and building of physical environments. It's a field that values hands-on problem solving and creative, "outside the box" thinking.

The Program

Macomb's Architectural Technology program provides an opportunity for you to develop a background in drafting skills and computer design applications, and to attain the knowledge required to work in the architectural building and construction industry. An Associate of Applied Science Degree in Architectural Technology could also be the foundation for eventual registration as an architect or for other bachelor's degree programs.

Certificates are available in:

- Commercial Design
- Civil Construction
- Construction Management

Macomb
Community College

Education • Enrichment • Economic Development

Discover. Connect. *Advance.*

If you can dream it, you can build it!

Good jobs are available without a four-year degree!

Facilities Design and Construction Programs

- Architectural Technology
- Civil Technology
- Climate Control Technology
- Construction Management
- Land Surveying Technology

TRANSFERRING IS EASY

Credits earned at Macomb may be transferable. Students intending to transfer to another college or university should talk to a Macomb counselor or academic advisor before registering for classes.
